#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Comast Smartzone Manual Guide

Ruckus SmartZone 300 Console Cable Kit Quick Setup Guide

Console Cable Kit Package Contents

Before configuring, verify that the console cable kit package that you received is complete.

A complete console cable kit package contains one of each:

- RJ45-to-DB-25 Type A male connector console cable
- If any part of the cable appears damaged, contact Ruckus Wireless Support.

HOW TO USE THIS GUIDE

1. If your computer is unable to download the driver, automatically download the required driver manually from <http://www.ruckus.com/Downloads>.
2. On your computer, start your driver console program for Windows, Mac OS, or Linux, and set the connection settings.
3. Run the console cable.
4. On your computer, start your driver console program for Windows, Mac OS, or Linux, and set the connection settings.
5. Run the console cable.
6. Run the console cable.

Using the Console Cable to Connect Your Computer to the Controller

Use the Console Cable Kit to connect the USB port of a computer to one of the Console ports on a controller.

NOTE: This controller has two Console ports. This can allow only one of those two Console ports at any given time.

Follow these steps to connect your computer to the controller using the console cable:

1. Make sure the controller is powered on.
2. Insert the RJ45 end of the console cable into the Console port (either on the front or rear of the controller, look for the label).
3. Insert the USB connector end of the console cable into a USB port on your computer.

If your computer is running Microsoft Windows version 7.0, 8.0, or 10 and has an active Internet connection, Windows will automatically install the driver that is required for the USB connection to work.

Part Number	Description
902-0340-000	1x RJ45-to-DB-25 Type A male connector console cable (RJ45 to DB-25)
