28. If 2 pts. lie in a plane, then the line containing those pts. lies in the plane.
29. If 2 lines intersect, then they intersect in exactly 1 pt.
30. It is not possible. By Post. 1-1, any 3 noncollinear pts. are contained in a unique plane. If the 3 pts. are collinear, they are contained in infinitely many planes. In either case, the 3 pts. will be coplanar.
